

Care About Cancer Conference

June 16-18, 2011, Shaw Conference Centre, Edmonton

MARK YOUR CALENDARS!

AHS Cancer Care is holding its first integrated and interdisciplinary cancer care conference in Alberta.

Care About Cancer will cover the breadth of cancer control, from prevention to survivorship and palliative care.

Cancer is a disease that most health care professionals deal with at some point in their clinical careers. Researchers, oncologists, primary care staff, screening and prevention experts and care providers from multiple cancer centres and other health disciplines will join together.

A patient and family forum will allow researchers, care providers, patients and their families to learn, share and interact with each other.

Watch for the advance program and registration information on the Learning Link pages on *Insite* in coming weeks.

For more information phone Maura Beaton on 780-643-4484 or email: maura.beaton@albertahealthservices.ca.

This conference is hosted by AHS Cancer Care in partnership with the Alberta Cancer Foundation.
